THE TRIBUNE was amused to hear of one of our citizens sending to Jacksonville for some printing, "because they did not know that THE TRIBUNE did two or three color work." We do more of that class of work than we do of ordinary plain printing, and at a much less figure than any house in Florida's metropolis. We would like to whisper in the ears of the young ladies of the Indian River section that no house in the United States can put up better and more proper wedding invitations, announcements and cards than can be prepared right here in Fort Pierce, in THE TRIBUNE office, and your secret will be respected.

### A SUN BATH.

It is a Potent Factor in the Cure of Any Disease.

There is no disinfectant made by man that can compare with the sun's rays in effectiveness.

A sun bath is a most potent factor in the cure of any disease. After one's skin becomes accustomed to the direct rays of the sun one may lie in the sunshine for hours at a time with great benefit, but at first the exposure should be of only a few minutes' duration at one time. These short periods, however, may be repeated several times a day. The best results are obtained by exposing the bare skin of the whole body (except the head) to the direct rays of the sun. Consequently a cot placed in the bow window of an upper chamber is an ideal place for a sun bath, provided that the air in the chamber is absolutely fresh and pure.

To sit on the porch in the sun is very beneficial, even if one must be so warmly wrapped up as to make it difficult for the sun's rays to penetrate to the skin.

To lie on the grass in the sun is better still—on the grass with only a blanket between the invalid and the healing powers of mother earth.

The patient's head should not be exposed to the direct rays of the sun in any case, and a sun bath should be followed by a cool sponge bath when possible.—Maxwell's Talisman.

### No Show.

Magistrate—How comes it that you dared to break into this gentleman's house in the dead of night? Prisoner—Why, your honor, the other time you reproached me for stealing in broad daylight. Ain't I to be allowed to work at all?

### A Suspicious Agreement.

"I guess your watch is wrong."  
"What! My watch doesn't vary a quarter of a minute."  
"Well, I don't know how much it's out of the way, but your time is too blamed near mine to be right."

### EDEN.

Work has begun on our public dock.

The old, original store has been painted and is now used as a storage house.

Sunday was what you might call a rainy day. We had plenty of rain, but no wind, from the great tropical storm.

It really seems as if we are waking up. There are a number of improvements going on and others contemplated. We may amount to something after all.

It is to be hoped that the St. Lucie river inlet agitation will take definite shape soon. That will mean more to us than any other thing that can possibly be done.

James Haisten has planted a number of trees on the S. F. Travis property. He takes great pride in keeping everything clean and neat about the place, and will soon have grass and shrubbery growing to cover the white sand.

### A DESIRE TO PLEASE.

It is Always Appreciated, and in Business it Pays.

There is nothing people appreciate more than being served by those who really enjoy accommodating them. What a comfort, at a strange hotel especially, to be served by those who seem anxious to please us, who seem to take real pleasure in making us feel at home and comfortable! There is no one quality which will help youth along more rapidly than the cultivation of this desire to please, to accommodate. It appeals to everybody; it creates a good impression.

What a pleasure and a comfort when traveling to be served by pleasant, good natured people who try to please us! A surly, impudent Pullman porter often destroys the pleasure of a whole journey on a train. An impudent clerk in a hotel office can make everybody in the house uncomfortable, and such service is dear, even if it could be had for nothing.

It is noticeable that a boy who always tries to help wherever he can and to make everybody comfortable, who is accommodating in everything, is very popular and, other things being equal, most likely to be promoted.—Success.

### The Mudding Crowd.

One thing that annoys and humiliates a western man in New York city is the way in which he is herded with the crowd. Out west a man is an individual. He feels that he is somebody, a responsible citizen, a factor in the community, a person more or less worth while, entitled to a certain amount of respect merely as a man and regardless of wealth or social position or political power. But in New York, unless one is somebody very important, he is nobody at all. He is a mere unit in the mob, of no more moment than one ant in a hill.—San Francisco Bulletin.

### Scarlet Fever.

An English physician declares that it is better to keep scarlet fever patients at home, where the germs die out gradually in the fresh air, than to send them to a hospital, where they are in the midst of dozens of other cases in all stages of the disease. On their return to school the germs are called into activity by the foul air in the room, and the disease is spread to others.

### WHITE CITY.

Mr. and Mrs. H. Larsen were visiting friends on Indian river Sunday.

Saturday afternoon Mrs. Hammer was pleasantly surprised by a large number of her friends who came to congratulate her in honor of her birthday. Delicious cake and coffee were served and after spending a most enjoyable afternoon the guests departed, wishing their genial hostess "many happy returns of the day."

### EFFIGIES AT FUNERALS.

A Curious Custom That Was Followed in the Olden Days.

At the funerals of great personages, the old chronicles tell us, "his lively effigy," dressed to imitate life, was carried in a chariot before the corpse to the grave, then there set up under a "hearse" or a temporary monument in the church. Such effigies were often left in a glass case standing over the vault where the interment had taken place. Some statues were of wood, with heads of plaster, but the more modern ones were of wax. In the olden days laudatory poems or epitaphs were affixed with pins or wax to these "hearses" and were even thrown into graves on the coffins in a similar manner to our modern custom of flowers at a burial. When Skelton, poet laureate to Henry VIII., "took sanctuary at Westminster to escape the displeasures of the then all powerful Cardinal Wolsey it is said that he subsisted on what he earned by writing epitaphs for use at funerals in the abbey. Ben Jonson's well known epitaph to the Countess of Pembroke—

Underneath this sable hearse  
Lies the subject of all verse,  
Sidney's sister, etc.—

was evidently thus attached to her "hearse."—Gentleman's Magazine.
